REPORT ON

SIMILARITIES AND DIFFERENCES

IN REGARD TO ORGANIZATION, METHODS, AND ARRANGEMENTS

FOR

PROCESSING PLAIN-TEXT TRAFFIC FOR THE PRODUCTION OF COMINT
AND A FEW COMMENTS THEREON

By: WILLIAM F. FRIEDMAN

Date: 31 March 1952

TOP SECRET SUID

## TOP SECRET SUPPLY SECURITY INFORMATION

1		a.	The	term	Com	municatio	ons	Intelli	gence	(COM	INT)	designat	es	the
inform	ati	on	and t	techni	ical	materia	Ţ	sulting	from	the	inter	rception	and	,
study	of	int	erce	oted o	COMM	unication	ns.	L						

- b. The term traffic analysis (T/A) designates the operations involved in the study of the "externals" and characteristics of intercepted communications (procedure signals, message headings, call signs, etc., D/F bearings, data, and other technical aids) for the purpose of obtaining information concerning the organization and operation of the communication system or networks on which the communications are passing.
- c. The term traffic intelligence (T/I) is that COMINT which is produced by drawing inferences or deductions from the information obtained by T/A operations defined above.
  - d. The term plain text (P/T) includes communications of two sorts:
  - (1) Category 1 Plain-language communications passed on internal radio links of the country involved.

EO 3.3(h)(2) PL 86-36/50 USC 3605

(2) Category 2 - Plain-language and

of the world.

- e. The term processing refers to the steps and operations performed on intercepted communications, up to and including their translation. It does not include the preparation of reports, appreciations, digests, etc., based upon the information constituting the end-product of the COMINT, T/A and T/I operations; that is, the term does not include the preparation of so-called finished "intelligence."
- 2. a. The principal differences organizations and arrangements for the processing of plain-text are as follows:

PL 86-36/50 USC 3605 EO 3.3(h)(1)B

(1) The COMINT establishment is currently organized on a centralized functional basis, that is, the structure as a whole

- 1. This and the following definitions apply to the terms as specifically used in this report.
- 2. This information is used (1) as a guide to efficient intercept control and operation, (2) as an aid to cryptanalysis, and (3) as a basis for what is defined in 1c.
- 3. Commercial code is included in this category because such codes are available and are intended for economy, not secrecy.

## TOP SECRET SUEDE

e. Finally, as to the fourth suggestion, it is hardly necessary to point out the administrative and other problems of having personnel who do not belong to you work in your quarters but not under your administrative or operational control. There are enough cases of this sort of thing already - where the necessity for them is much more evident than in the case under consideration.

WILLIAM F. FRIEDMAN Consultant
